

Download & Install Instructions for SOLIDWORKS 2020

- A. If you are upgrading from a previous version of SolidWorks you must do a complete uninstall of the old version before beginning the install process for the new version. See the next page for instructions on how to do a complete uninstall.
- B. To install SolidWorks 2020, do the following:
 1. Go to <http://www.solidworks.com/SEK>

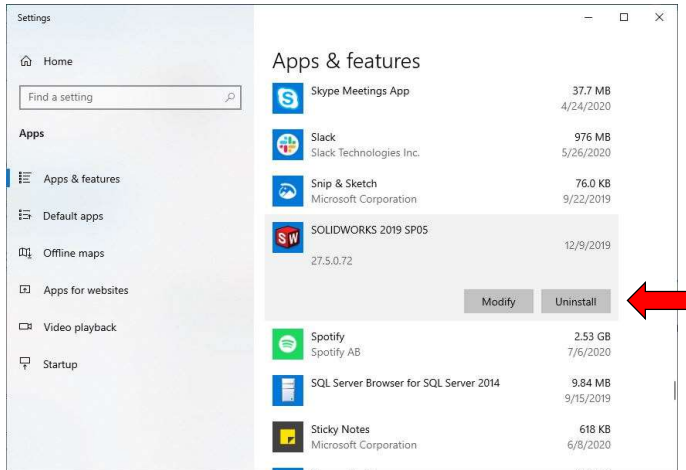

The screenshot shows a web form for requesting a SolidWorks 2020 download. It is divided into two main sections: 'Contact Information' and 'Product Information'. In the 'Contact Information' section, there are input fields for 'FIRST NAME', 'LAST NAME', and 'EMAIL', along with a dropdown menu labeled 'Select one of the following (optional)'. The 'Product Information' section contains a radio button group for 'I already have a Serial Number that starts with 9020' with options 'Yes' (selected) and 'No'. Next to it is another radio button group for 'Academic Version' with options '2020-2021' (selected) and '2019-2020'. A red arrow points to the 'Yes' radio button, and another red arrow points to the '2020-2021' radio button. At the bottom right of the form is a blue button labeled 'Request Download'.

2. Fill out the name and email fields. Select '*I already have a Serial Number that starts with 9020*'. Select the 2020-2021 version. Complete the other fields then select *Request Download*.
3. Run the program you just downloaded, select Unzip, and then install the software using the on screen instructions. Select all the default choices.
4. Use Serial Number **9020-0131-2842-4068-FSQD-644K** in the field labeled '3D Design'. You don't need to enter any additional serial numbers.
5. To save disk space, you can select 'Change' next to Products and deselect certain sub-programs. Be sure to check the box 'I accept the terms ...'.

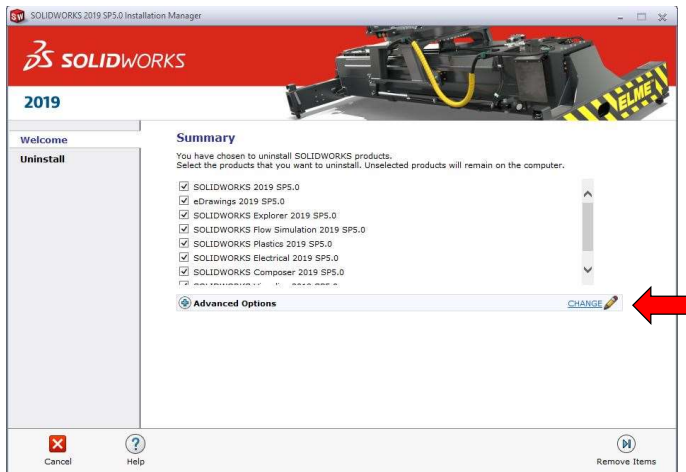

How to do a Complete Uninstall of SolidWorks

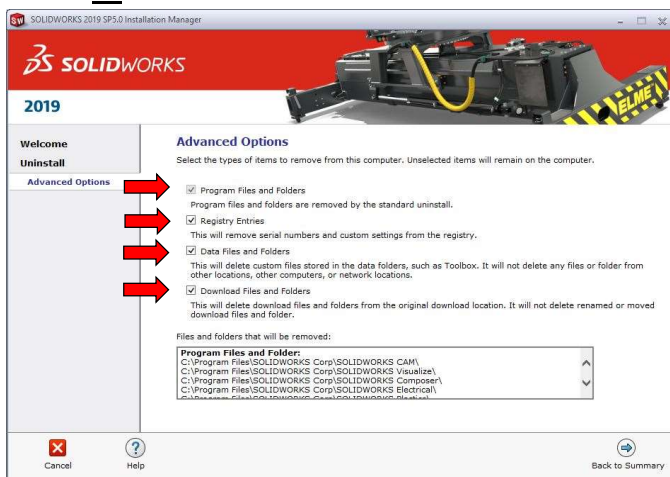

1. Open 'Apps and Features' in Windows.
2. Find the SolidWorks program and select 'uninstall'.

3. When you get to the 'Summary' page, select 'Change'.

4. Select all the boxes.

5. Continue with the uninstall process. If asked, select 'deactivate license'.
6. After the process is complete, reboot your computer before installing a new version of SolidWorks.
